(Barclays Africa Group, BAGL or the Group)

Audited summary consolidated financial results for the reporting period ended 31 December 2015.

The annual consolidated and separate financial statements are available upon request from Barclays Africa Group Limited Company Secretariat.

#### Profit and dividend announcement for the reporting period ended 31 December

### Salient features

- Diluted HEPS increased 10% to 1 686 cents.
- Declared a DPS of 1 000 cents, up 8%.
- Rest of Africa headline earnings grew 17% to R2,3bn and South Africa rose 8% to R12,0bn.
- RoE improved to 17,0% from 16,7%.
- Pre-provision profit increased 8% to R29,5bn.
- Revenue grew 6% to R67,2bn, as net interest income increased 8% and non-interest income rose 5%, while operating expenses grew 5% to R37,7bn.
- Credit impairments increased 10% to R6,9bn resulting in a 1,05% credit loss ratio from 1,02%.
- Barclays Africa Group Limited's CET1 ratio of 11,9% remains above regulatory requirements and our Board target range.

## **Overview of results**

Barclays Africa Group Limited's ("the Group") headline earnings increased 10% to R14 287m from R13 032m. Diluted headline earnings per share ("HEPS") also grew 10% to 1 686 cents from 1 538 cents. The Group's Return on Equity ("RoE") improved to 17,0% from 16,7%, comfortably above its 13,75% Cost of Equity ("CoE") for 2015, due to its return on assets rising to 1,37% from 1,33%. Barclays Africa Group declared a 8% higher full year ordinary Dividend per share ("DPS") of 1 000 cents, given its strong Common Equity Tier ("CET1") ratio and internal capital generation capacity. Net asset value ("NAV") per share increased 8% to 10 558 cents.

Pre-provision profit increased 8% to R29,5bn, which drove earnings growth. Non-interest income grew 5% and net interest income 8%, as the Group's net interest margin (on average interest-bearing assets) improved to 4,81% from 4,65%. Loans and advances to customers grew 11% to R703bn, while deposits due to customers increased 10%, to R688bn. The Group's cost-to-income ratio improved to 56,0% from 56,8% as operating expenses rose 5%. Credit impairments grew 10% as Non-performing loans ("NPL") cover rose marginally and portfolio provisions increased to 0,73% of performing loans from 0,70%. NPLs declined to 3,9% of gross loans and advances to customers from 4,2%.

Retail and Business Banking ("RBB") headline earnings increased 14% to R9,7bn, as revenue grew 6% and costs rose 4%, with Home Loans and Card earnings growing 15% and 25% respectively. Wealth, Investment Management and Insurance ("WIMI") headline earnings increased 11% to R1,5bn, with 14% growth in Life Insurance, while Corporate Investment Bank ("CIB") grew 6% to R3,9bn, including 16% higher Corporate earnings.

Revenue from Rest of Africa grew 14% and headline earnings rose 17% to R2,3bn, to contribute 21% and 16% of the total Group respectively.

## **Operating environment**

Global markets saw heightened financial volatility, renewed pressure on commodity prices and concerns about growth. We expect global growth of 3,1% in 2015, supported by consumption in advanced economies. Emerging market growth slowed largely led by China, Brazil and Russia. The Federal Reserve raised rates for the first time since 2006. Conversely, monetary policy was eased in the euro area during the year.

South Africa's growth slowed under the pressure of drought, continued electricity supply challenges and falling commodity prices. Weak consumer confidence and rising interest rates weighed on household spending. Economic growth is forecast to have slowed to 1,3% in 2015 from 1,5% in 2014. The rand lost a quarter of its value against major currencies during the year. Growth in the Barclays Africa Group markets in the rest of Africa moderated further due to lower commodity prices and an adverse external environment. Fiscal and current accounts deteriorated, putting pressure on African currencies and inflation.

## Group performance

#### Statement of financial position

Total Group assets increased 15% to R1 145bn at 31 December 2015, predominantly due to 11% higher loans and advances to customers, while trading portfolio assets grew 52% and loans and advances to banks rose 19%.

#### Loans and advances to customers

Loans and advances to customers increased 11% to R703bn, or to 7% excluding rand depreciation and growth in reverse repurchase agreements. Retail Banking South Africa's loans rose 2% to R375bn, given 6% growth in Vehicle and Asset Finance ("VAF") and 8% higher Personal Loans, while Home Loans was flat. Business Banking South Africa's loans rose 4% to R64bn, including 15% higher term loans and 9% growth in agriculture loans. RBB Rest of Africa's loans increased 26% to R45bn, in part due to rand depreciation. CIB's loans increased 29% to R214bn, given strong growth in term loans, preference shares and reverse repurchase agreements.

### Group performance (continued)

#### Statement of financial position (continued)

#### Funding

The Group maintained its strong liquidity position, growing deposits due to customers 10% to R688bn and improving its loans-to-deposit ratio to 86% from 87%. Deposits due to customers contributed 78% to total funding from 80%. Retail Banking South Africa maintained its leading market share and increased deposits 10% to R166bn. Business Banking South Africa's deposits grew 9% to R110bn, with 19% higher savings and transmission deposits. RBB's 12% deposit growth reduced the proportion of more expensive wholesale funding. CIB's deposits increased 6% to R242bn, given 10% higher cheque account deposits and 8% lower fixed deposits.

#### Net asset value

The Group's NAV rose 8% to R89,3bn, as it generated profits of R14,3bn in the period, from which it paid R8,2bn in dividends. Its foreign currency translation reserve grew by R3,0bn to R6,5bn. The Group's NAV per share also grew 8% to 10 558 cents.

#### Capital to risk-weighted assets

Group risk-weighted assets ("RWA(s)") increased 13% to R703bn at 31 December 2015, in line with its asset growth. The Group remains well capitalised, comfortably above minimum regulatory requirements. Barclays Africa Group Limited's CET1 and Tier 1 capital adequacy ratios were 11,9% and 12,6% respectively (from 11,9% and 12,7%). The Group generated 2,1% of CET1 capital internally during the period. Its total capital adequacy ratio was 14,5%, at the top end of the Board target range of 12,5% to 14,5%. Declaring an 8% higher DPS of 1 000 cents – a dividend cover of 1,7 times – was well considered, based on the Group's strong capital position, internal capital generation, strategy and growth plans.

#### Statement of comprehensive income

#### Net interest income

Net interest income increased 8% to R38 407m from R35 601m, with average interest-bearing assets growing 4%. The Group's net interest margin improved to 4,81% from 4,65%.

Loan pricing had an 8 basis points ("bps") positive impact, as improved pricing in Home Loans and Personal Loans offset compression in Vehicle and Asset Finance. The deposit margin was unchanged, as compression in Business Banking offset improved retail spreads and the mix benefit of less wholesale funding.

Higher South African interest rates resulted in an endowment contribution on deposits and equity of 3 bps. Despite releasing R1 110m to the income statement, the benefit from structural hedging declined by 6 bps. The cash flow hedging reserve relating to the structural hedging programme decreased to a R2,1bn debit after tax from a R0,4bn credit. Rest of Africa added 4 bps to the Group margin, as its margin improved by 10 bps and its weighting in the overall composition increased. Changing the funding model for foreign currency loans within CIB added 8 bps to the total margin, partly offset by higher liquid assets.

#### Non-interest income

Non-interest income increased 5% to R28 791m from R27 524m accounting for 43% of total income. Rest of Africa grew 18% to R4 933m, with strong WIMI and RBB growth, to exceed South Africa's 2% increase to R23 858m. Net fee and commission income rose 8% to R20 155m, with strong growth in credit cards and electronic banking of 37% and 12% respectively, while merchant income decreased 7% to R1 731m due to reduced industry interchange rates.

RBB's non-interest income grew 7% to R18 238m, 63% of the total. Retail Banking South Africa increased 5% to R12 282m with 2% growth in customers offsetting continued migration to bundled products and electronic channels. Card's non-interest income grew 9%, with 14% growth in acquiring volumes, despite new interchange rules reducing revenue by R300m. Business Banking's non-interest income grew 5% to R3 336m, largely due to 14% higher cheque account income and 10% growth in electronic banking income. Enhanced digital functionality and reclassifying cash-handling device-related costs to non-interest income reduced cash-related transaction income growth by 3%, while cheque payment volumes fell 21%. RBB Rest of Africa's 21% higher non-interest income of R2 620m reflects increased transaction volumes, particularly in card and foreign exchange.

WIMI's non-interest income increased 7% to R4 962m, with improved growth in South Africa of 6% and a 24% rise in the Rest of Africa. Net insurance premiums grew 8% and Wealth and Investments by 10% on higher assets under management.

CIB's non-interest income decreased 9% to R5 926m, largely due to a change in its funding model for foreign currency loans that reduced trading revenue and R202m of negative revaluations in Private Equity. Overall Markets net revenue (revenue including credit impairments) decreased 3% to R4 106m with a 23% decline in Fixed Income and Credit and 19% lower Foreign Exchange and Commodities revenue in South Africa, offset by 23% and 21% growth in Rest of Africa Markets and Equities and Prime Services respectively.

## Group performance (continued)

Statement of comprehensive income (continued)

#### Impairment losses on loans and advances

Credit impairments increased 10% to R6 920m from R6 290m, resulting in a 1,05% credit loss ratio from 1,02%. Total NPL cover improved to 43,2% from 43,0%. Balance sheet portfolio provisions increased 15% to R5,0bn, or 0,73% of performing loans from 0,70%. Group NPLs declined to 3,9% of gross customer loans and advances from 4,2% while increasing 2,2% to R28,0bn.

RBB's credit impairments grew 1% to R6,1bn, a 1,29% credit loss ratio from 1,32%. Retail Banking South Africa's charge declined 2% to R4,8bn, as lower mortgage credit impairments outweighed a 6% rise in VAF.

Home Loans' charge decreased 20% to R689m, a 0,30% credit loss ratio, given improved collections processes and the high quality of new business written in recent years. Mortgage NPLs fell 11% to R9,3bn, 4,0% of gross loans. NPL cover in mortgages decreased to 22,1% from 25,3%, as aged NPLs were written off. VAF's credit loss ratio improved to 0,98% from 1,01%. Instalment credit agreements NPLs increased to 2,2% of gross loans and its NPL cover declined to 38,8%, due to accelerating write-offs of aged legal accounts, which reduced the NPL book's average age.

Credit card's charge increased 4% to R2 344m, a 6,07% credit loss ratio from 6,19%. The Edcon portfolio's charge declined 15% to R893m, a 10,18% credit loss ratio. The credit loss ratio for the remainder of the Card book increased 20% to R1 451m, reflecting the operating environment and seasoning of recent growth. Personal Loans' credit loss ratio improved to 5,64% from 6,06% reflecting lending to lower risk existing customers and enhanced collections.

Business Banking South Africa's credit impairments grew 4% to R548m, a flat 0,87% credit loss ratio. A 70% lower charge for Commercial Property Finance ("CPF") and mortgages was the driver, while term loan impairments increased significantly. NPLs fell 16% to R3 306m or 5,1% of gross loans. Performing loan cover increased further to 1,07%. RBB Rest of Africa's credit impairments rose 21% to R777m, increasing its credit loss ratio to 2,07% from 1,95%. Its NPLs increased 9% to R3 573m, while performing loan cover increased to 1,12% from 0,95%. CIB's credit impairments increased 220% off a low base to R793m, reflecting maturation of its loan growth and deterioration in some sectors. NPLs rose 72% to R2 834m, while portfolio provisions increased to 0,36% of performing loans.

#### Operating expenses

Operating expenses grew 5% to R37 661 m from R35 848m. South Africa's 4% cost growth was below inflation, while Rest of Africa's costs rose 9%, reflecting continued investment spend. Staff costs rose 8% to R20 902m to account for 56% of total expenses. Salaries grew 8% due to higher wage increases for entry level employees and hiring in specialist areas such as Information Technology ("IT"). Incentives rose 5%, as bonuses rose 11% and share-based payments fell 8%.

Non-staff costs grew 1,5% to R16 759m, as structural cost programmes produced efficiency gains that enabled continued investment in growth initiatives. Property-related costs decreased 1% to R5 209m, reflecting portfolio optimisation and lower dilapidation costs. Total IT-related costs increased 7% to R6 675m, 18% of overall costs. Depreciation declined 3% and amortisation of intangible assets decreased 6% due to impairments recognised in 2014. Marketing costs grew 8% to R1 740m, given increased product advertising. Professional fees increased 18% reflecting strategic growth projects. Barclays Bank PLC spent approximately GBP30m on IT in the Rest of Africa, which will continue for another two years. Other costs fell 18%, largely due to reduced fraud losses.

RBB and WIMI's operating expenses increased 4% to R28 168m and 4% to R3 018m respectively. Retail Banking South Africa's operating expenses grew 3%, driven by operational efficiencies and managing discretionary costs. Despite investing in relationship managers and systems, Business Banking South Africa's cost growth was contained to 4%. RBB Rest of Africa's operating expenses grew 7% despite strategic investments and inflationary pressures. CIB's cost grew 9% to R7 436m, reflecting higher IT spend.

#### Taxation

The Group's taxation expense increased 6% to R5 899m, slightly less than the 8% growth in pre-tax profit, resulting in a 27,7% effective tax rate from 28,3%. The decline was largely due to reducing expenses that were not deductible for tax purposes.

## Segment performance

Group earnings remain well diversified by business and product line. RBB accounted for 64% of Group headline earnings excluding head office, eliminations and other central items. CIB contributed 26% and WIMI 10%.

### Retail Banking South Africa

Headline earnings grew 16% to R6 628m, driven by 10% higher pre-provision profits and 2% lower credit impairments. Transactional and Deposits earnings grew 9% to R2 672m, given 14% higher net interest income on 11% deposit growth. Home Loans' earnings rose 15% to R1 813m, due to 9% lower costs and a 20% reduction in credit impairments. Card earnings increased 25% to R1 678m, as 6% revenue growth exceeded 1% lower costs.

5

### Segment performance (continued)

#### Retail Banking South Africa (continued)

and its credit loss ratio improved to 6,07%. The Edcon portfolio generated earnings of R123m, from its 2014 loss of R9m, due to far lower credit impairments. VAF's earnings declined 3% to R999m, given negative operating Jaws and 6% higher credit impairments. Personal Loans earnings grew 211% to R361m, reflecting 10% revenue growth, while costs and credit impairments fell 10% and 6% respectively. Losses in the 'Other' segment grew 13% to R895m, due to increased spending on strategic initiatives. Retail Banking South Africa accounted for 44% of total earnings, excluding the Group centre.

### Business Banking South Africa

Headline earnings increased 5% to R2 175m, reflecting 4% growth in its core franchise and a 17% smaller loss in the non-core equity portfolio. Pre-provision profits grew 3% with 3% revenue growth slightly below 4% higher costs, while its credit loss ratio remained flat at 0,87%. Its Return on Average Regulatory Capital ("RoRC") improved to 29,5% (2014: 28,3%) excluding equities. Business Banking South Africa generated 14% of overall earnings excluding the Group centre.

### Retail and Business Banking Rest of Africa

Headline earnings grew 24% to R895m or 17% in constant currency. Revenue growth of 12% exceeded 7% higher costs to increase pre-provision profits 28% and reduce its cost to income ratio to 69%. Credit impairments increased 21% resulting in a 2,07% credit loss ratio. RBB Rest of Africa contributed 6% of total earnings excluding the Group centre.

### Corporate and Investment Bank

Headline earnings rose 6% to R3 940m, due to 6% higher pre-provision profits and 25% lower taxation. Revenues grew 8%, with Rest of Africa increasing 15% and South Africa 4%. Markets' revenue declined 3%, with South Africa down 13% while Rest of Africa grew 23%. Costs rose 9%, reflecting continued investment in systems and technology. Credit impairments increased 220%, due to higher portfolio provisions and NPLs. Corporate earnings grew 16% to R1 965m, as 5% positive operating Jaws outweighed higher credit impairments. Corporate revenue grew 11% on 15% higher loans and advances to customers. Investment Bank's earnings fell 3% to R1 975m, given negative operating Jaws and increased credit impairments. CIB's RoRC declined to 17,1% from 19,5%, due to higher credit impairments. It contributed 26% of total earnings excluding the Group centre.

#### Wealth, Investment Management and Insurance

Headline earnings grew 11% to R1 464m and net operating income increased 16% to R1 924m. Life Insurance earnings rose 14% to R794m, due to 12% higher net premium income and 2% lower costs. Its return on embedded value declined to 22,7%. Life Insurance's embedded value of new business decreased 4% due to lower volumes in advice products and aligning credit life products and pricing outside South Africa. Wealth and Investment Management's earnings grew 5% to R438m given 11% gross operating income growth as net assets under management increased 6% to R274bn. Short-term Insurance earnings grew 40% to R237m as its underwriting margin and loss ratio improved. Fiduciary Services earnings increased 17% to R137m, while Distribution returned to profitability. WIMI's South African earnings grew 13% to R1 400m, while rest of Africa was flat at R49m. WIMI's RoE improved to 24,9% from 23,2% and it generated 10% of earnings excluding the Group centre.

### Prospects

6

While the risks of a global recession have abated, a meaningful acceleration in growth is unlikely. We forecast 3,3% global growth in 2016, but the outlook remains fragile, with risks tilted to the downside. Global monetary policy is expected to diverge, with tightening in the US while the euro area and China will continue to ease. In South Africa, weak confidence points to low investment and consumption spending in 2016. Inflation is expected to rise sharply, averaging 6,4% due to food inflation and a weaker rand. We forecast a further 75bps of interest rate increases this year and expect GDP growth to slow to 0,9%. Key risks facing South Africa include continued electricity supply disruptions and a potential credit ratings downgrade. Africa's medium-term outlook remains challenging given global and domestic factors. Overall, we expect economic growth of 5,1% in our presence countries in the rest of Africa.

Against this backdrop, we expect low single digit loan growth, with Rest of Africa growing faster than South Africa. The Group's net interest margin should decline slightly as a higher proportion of CIB lending, a lower contribution from our hedging programme and introducing the National Credit Act caps in May 2016, offset the endowment benefit of higher interest rates. The credit loss ratio is expected to increase, as arrears are rising and we believe NPLs have bottomed. However, continued focus on revenue growth and cost management should improve the Group's cost-to-income ratio further. The balance sheet is well positioned for a potential deteriorating economic environment given its high level of portfolio provisions and low NPLs, as well as strong capital ratios and liquidity.

## **Basis of presentation**

The Group's annual financial results have been prepared in accordance with the recognition and measurement requirements of International Financial Reporting Standards ("IFRS"), interpretations issued by the IFRS Interpretations Committee ("IFRS-IC"), the South African Institute of Chartered Accountants' Financial Reporting Guides as issued by the Accounting Practices Committee, Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the JSE Listings Requirements and the requirements of the Companies Act. The principal accounting policies applied are set out in the Group's most recent annual consolidated financial statements.

The summary consolidated financial statements are prepared in accordance with the requirements of the JSE Limited Listings Requirements for preliminary reports, and the requirements of the Companies Act applicable to summary financial statements. The Listings Requirements require preliminary reports to be prepared in accordance with the framework concepts and the measurement and recognition requirements of IFRS and the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council and to also, as a minimum, contain the information required by IAS 34 Interim Financial Reporting ("IAS 34").

The information disclosed in the SENS is derived from the information contained in the audited annual consolidated financial statements and does not contain full or complete disclosure details. Any investment decisions by shareholders should be based on consideration of the audited annual consolidated financial statements, which is available on request. The presentation and disclosure comply with International Accounting Standards IAS 34.

The preparation of financial information requires the use of estimates and assumptions about future conditions. Use of available information and application of judgement are inherent in the formation of estimates. The accounting policies that are deemed critical to the Group's results and financial position, in terms of the materiality of the items to which the policies are applied, and which involve a high degree of judgement including the use of assumptions and estimation, are impairment of loans and advances, goodwill impairment, fair value measurements, impairment of available-for-sale financial assets, consolidation of structured or sponsored entities, post-retirement benefits, provisions, income taxes, share-based payments, liabilities arising from claims made under short-term and long-term insurance contracts and offsetting of financial assets and liabilities.

## Accounting policies

The accounting policies applied in preparing the summary consolidated annual financial statements are the same as those in place for the reporting period ended 31 December 2014 except for:

- Business portfolio changes between operating segments; and
- Reclassification changes.

## Auditors' report

PricewaterhouseCoopers Inc. and Ernst & Young Inc., Barclays Africa Group Limited's independent auditors, have audited the consolidated annual financial statements of Barclays Africa Group Limited from which management prepared the summary consolidated financial results. The auditors have expressed an unqualified audit opinion on the consolidated annual financial statements. The summary consolidated financial results comprise the summary consolidated statement of financial position at 31 December 2015, summary consolidated statement of comprehensive income, summary consolidated statement of changes in equity and summary consolidated statement of cash flows for the reporting period then ended and selected explanatory notes, excluding items not indicated as audited. The audit report of the consolidated annual financial statements is available for inspection at Barclays Africa Group Limited's registered office.

These summary consolidated financial statements for the year ended 31 December 2015 have been audited by PricewaterhouseCoopers Inc. and Ernst and Young Inc., who expressed an unmodified opinion thereon. The auditors also expressed an unmodified opinion on the annual financial statements from which these summary consolidated financial statements were derived.

#### Profit and dividend announcement for the reporting period ended 31 December

## Events after the reporting period

The directors are not aware of any events occurring between the reporting date of 31 December 2015 and the date of authorisation of these summary consolidated annual financial results as defined in IAS 10 – Events after the Reporting Period ("IAS 10").

The directors refer shareholders to the Group's cautionary SENS announcement of 29 February 2016 regarding market speculation surrounding Barclays PLC's shareholding in Barclays Africa Group Limited.

On behalf of the Board

**W E Lucas-Bull** Group Chairman **M Ramos** Chief Executive Officer

Johannesburg 29 February 2016

## Declaration of final ordinary dividend number 59

Shareholders are advised that an ordinary dividend of 550 cents per ordinary share was approved on 29 February 2016 and was declared today, 1 March 2016, for the period ended 31 December 2015. The ordinary dividend is payable to shareholders recorded in the register of members of the Company at the close of business on 8 April 2016. The directors of Barclays Africa Group Limited confirm that the Group will satisfy the solvency and liquidity test immediately after completion of the dividend distribution.

The dividend will be subject to local dividend withholding tax at a rate of 15%. In accordance with paragraphs 11.17(a)(i) to (x) and 11.17(c) of the JSE Listings Requirements, the following additional information is disclosed:

• The dividend has been declared out of income reserves.

• The local dividend tax rate is fifteen per cent (15%).

• The gross local dividend amount is 550 cents per ordinary share for shareholders exempt from the dividend tax.

• The net local dividend amount is 467,50 cents per ordinary share for shareholders liable to pay for the dividend tax.

• Barclays Africa Group currently has 847 750 679 ordinary shares in issue (includes 2 025 369 treasury shares).

• Barclays Africa Group Limited's income tax reference number is 9150116714.

In compliance with the requirements of Strate, the electronic settlement and custody system used by JSE Limited, the following salient dates for the payment of the dividend are applicable:

Last day to trade cum dividend	Friday, 1 April 2016
Shares commence trading ex dividend	Monday, 4 April 2016
Record date	Friday, 8 April 2016
Payment date	Monday, 11 April 2016

Share certificates may not be dematerialised or rematerialised between Monday, 4 April 2016 and Friday, 8 April 2016, both dates inclusive. On Monday, 11 April 2016, the dividend will be electronically transferred to the bank accounts of certificated shareholders. The accounts of those shareholders who have dematerialised their shares (which are held at their participant or broker) will also be credited on Monday, 11 April 2016.

 Notes

 All movements are reflected net of taxation.

 (1) The movement during the current reporting period is largely due to the elimination of treasury shares in the share incentive trust. These shares were acquired by the trust as part of the conversion of the cash-settled share-based payment schemes.

 (2) During the current reporting period the Group acquired a 63% shareholding in First Assurance Holdings Limited.

 (3) The Group disposed of part of its interest in National Bank of Commerce ("NBC"), reducing its interest from 66% to 55%.

 Notes

 (1) These numbers have been restated, refer to note 14 for reporting changes.

 (2) Includes coins and bank notes.

 (3) Includes call advances, which are used as working capital by the Group.

#### 1. Non-current assets and non-current liabilities held for sale

The following movements in non-current assets held for sale were effected during the current financial reporting period:

- CIB transferred investment securities with a carrying value of R 1 282m.
- Disposals of non-current assets and liabilities held for sale occurred in RBB (including Commercial Property Finance ("CPF")). The profit on disposal of the non-current assets held for sale has been recognised in other operating income in the statement of comprehensive income.
- Other assets and liabilities disclosed remain classified as non-current assets held for sale as the Group has assessed that the sales remain highly probable.

The following movements in non-current assets held for sale were effected during the previous financial reporting period:

- RBB transferred investment securities with a carrying value of R29m.
- The Head Office and other operations segment transferred property and equipment with a carrying value of R3m.
- RBB transferred investment properties with a carrying value of R376m.
- The CPF Equity division in RBB disposed of a non-core subsidiary with investment property with a carrying value of R1 315m. Other disposals of non-current assets and liabilities held for sale occurred in the RBB, WIMI and Head Office and other operations segments.
- The General Fund was amalgamated with the Absa Select Equity Fund and WIMI, and therefore ceased to exist as an independent fund. This resulted in the derecognition of the related financial assets of R2 324m and liabilities of R973m of the Absa General Fund, previously classified as non- current assets and liabilities held for sale in the 2013 financial reporting period.

#### 2. Borrowed funds

During the reporting period the significant movements in borrowed funds were as follows: R4 870m (2014: R531m) of subordinated notes were issued and R2 455m (2014: R4 966m) were redeemed.

	321	305

#### 6. Acquisitions and disposals of businesses

#### 6.1 Acquisitions of businesses during the current reporting period

The Group recently acquired 63% of the issued ordinary share capital of First Assurance Company Limited ("FACL"), an East African insurer, with operations in both Kenya and Tanzania. The acquisition of the investment in FACL had an effective acquisition date of 30 October 2015, and is a business combination within the scope of IFRS 3.

The non-controlling interest mentioned below was measured at its proportionate share of the acquiree's identifiable net assets. Goodwill of R164m has been recognised mainly due to intangible assets that do not qualify for separate recognition.

The transaction is currently under Purchase Price Allocation ("PPA") consideration as the due diligence is currently under way to finalise the contractual net asset value ("NAV") and to agree the final NAV between purchaser and seller. The initial accounting considerations include the valuation of intangible assets (identified in terms of IFRS 3 – i.e. Brand Names and Distribution Force), Premium debtors, Investment Properties and the Valuation of Policyholder liabilities.

From the date of acquisition, FACL contributed R9m to profit after tax of the Group. If the combination had taken place at the beginning of the year, profit after tax for the Group would have increased by R37m.

The Group also purchased additional shares in a non-core joint venture which resulted in an increase in the Group's effective shareholding from 50% to 67%. The profit share that the Group is entitled to is 74%. The acquisition occurred on 18 November 2015. A Bargain Purchase amount of R4m was recognised in the statement of comprehensive income.

Summary of net cash outflow due to acquisitions	384	_

#### 6.1.2 Disposals of businesses during the current reporting period

National Bank of Commerce Limited ("NBC") was recapitalised through a rights issue to all its shareholders during 2013. As the Government of Tanzania ("GoT") did not wish to subscribe to its rights at the time, an option was granted to GoT providing it with the right to purchase its pro rata portion of the shares from the Group within a period of two years after the rights issue. The GoT exercised its option during the reporting period which resulted in a decrease of the Group's shareholding from 66% to 55%.

#### 6.2.1 Acquisitions and disposals of businesses during the previous reporting period

There were no acquisitions or disposals of businesses during the previous reporting period.

#### 7. Related parties

There were no one-off significant transactions with related parties of the Group during the current and previous reporting period.

#### 8. Financial guarantee contracts

	2015 Rm	2014 Rm
Financial guarantee contracts	24	96

Financial guarantee contracts represent contracts where the Group undertakes to make specified payments to a counterparty, should the counterparty suffer a loss as a result of a specified debtor failing to make payment when due in accordance with the terms of a debt instrument. This amount represents the maximum off-statement of financial position exposure.

#### 9. Commitments

	2015 Rm	2014 Rm
Authorised capital expenditure Contracted but not provided for	1 642	1 675
The Group has capital commitments in respect of computer equipment and property development. Management is confident that future net revenue and funding will be sufficient to cover these commitments.		
Operating lease payments due No later than one year Later than one year and no later than five years Later than five years	758 1 742 956	856 1 631 709
	3 456	3 196
The operating lease commitments comprise a number of separate operating leases in relation to property and equipment, none of which is individually significant to the Group. Leases are negotiated for an average term of three to five years and rentals are renegotiated annually.		
Sponsorship payments due No later than one year Later than one year and no later than five years	147 177	282 307
	324	589
The Group has sponsorship commitments in respect of sports, arts and culture.		
Other commitments		

No later than one year	991	991	
The South African Reserve Bank ("SARB") appounced in August 2014 that African Bank Investments Limited ("ARIL") w	vould be placed	under	

The South African Reserve Bank ("SARB") announced in August 2014 that African Bank Investments Limited ("ABIL") would be placed under curatorship. A consortium of six South African banks (including Barclays Africa Group Limited) and the Public Investment Corporation ("PIC") have underwritten R5bn respectively. 50% of the amount underwritten by the banks is guaranteed by the SARB, of which Barclays Africa Group Limited committed R991m (pre the SARB guarantee). The value of the amount to be underwritten was determined with reference to the respective underwriter's proportion of total Tier 1 capital of the consortium as at 30 June 2014.

#### 10. Contingencies

	2015 Rm	2014 Rm
Guarantees Irrevocable debt facilities Irrevocable equity facilities Letters of credit Other	37 901 152 984 364 7 466 5 325	34 011 125 334 366 4 827 3 774
	204 040	168 312

Guarantees include performance and payment guarantee contracts.

Irrevocable facilities are commitments to extend credit where the Group does not have the right to terminate the facilities by written notice. Commitments generally have fixed expiry dates. Since commitments may expire without being drawn upon, the total contract amounts do not necessarily represent future cash requirements.

#### 10. Contingencies (continued)

#### Legal proceedings

The Group is engaged in various litigation proceedings involving claims by and against it, which arise in the ordinary course of business. The Group does not expect the ultimate resolution of any proceedings, to which the Group is party, to have a significant adverse effect on the financial statements of the Group. Provision is made for all liabilities which are expected to materialise.

#### **Regulatory matters**

The scale of regulatory change remains challenging and the global financial crisis is resulting in a significant tightening of regulation and changes to regulatory structures globally, especially for companies that are deemed to be of systemic importance. Concurrently, there is continuing political and regulatory scrutiny of the operation of the banking and consumer credit industries globally which, in some cases, is leading to increased regulation. The nature and impact of future changes in the legal framework, policies and regulatory action cannot currently be fully predicted and are beyond the Group's control, but especially in the area of banking and insurance regulation, are likely to have an impact on the Group's businesses and earnings. The Group is continuously evaluating its compliance programmes and controls in general. As a consequence of these compliance programmes and controls, including monitoring and review activities, the Group has also adopted appropriate remedial and/or mitigating steps, where necessary or advisable, and made disclosures on material findings as and when appropriate.

#### Income taxes

The Group is subject to income taxes in numerous jurisdictions and the calculation of the Group's tax charge and worldwide provisions for income taxes necessarily involves a degree of estimation and judgement. There are many transactions and calculations for which the ultimate tax treatment is uncertain or in respect of which the relevant tax authorities may have indicated disagreement with the Group's treatment and accordingly the final tax charge cannot be determined until resolution has been reached with the relevant tax authority. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due after taking into account expert external advice where appropriate. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the reporting period in which such determination is made. These risks are managed in accordance with the Group's Tax Risk Framework.

#### 11. Segment reporting

Notes
<sup>(1)</sup> Operational changes, management changes and associated changes to the way in which the Chief Operation Decision Maker ("CODM") views the performance of each business segment, have resulted in the reallocation of earnings, assets and liabilities between operating segments. For details on business portfolio changes, refer to note 1.21 of the audited annual consolidated and separate financial statements approved on 29 February 2016.

#### 13. Assets and liabilities held at fair value

#### 13.1 Fair value measurement and valuation processes

#### Financial assets and financial liabilities

The Group has an established control framework with respect to the measurement of fair values. The framework includes a Valuation Committee and an Independent Valuation Control team ("IVC"), which is independent from the front office.

The Valuation Committee, which comprises representatives from senior management, will formally approve valuation policies and any changes to valuation methodologies. Significant valuation issues are reported to the Barclays Africa Group Audit and Compliance Committee.

The Valuation Committee is responsible for overseeing the valuation control process and will therefore consider the appropriateness of valuation techniques and inputs for fair value measurement.

The IVC independently verifies the results of trading and investment operations and all significant fair value measurements. They source independent data from external independent parties, as well as internal risk areas when performing independent price verification for all financial instruments held at fair value. They also assess and document the inputs obtained from external independent sources to measure the fair value which supports conclusions that valuations are performed in accordance with IFRS and internal valuation policies.

#### Investment properties

The fair value of investment properties is determined based on the most appropriate methodology applicable to the specific property. Methodologies include the market comparable approach that reflects recent transaction prices for similar properties, discounted cash flows and income capitalisation methodologies. In estimating the fair value of the properties, the highest and best use of the properties is taken into account.

Where possible the fair value of the Group's investment properties is determined through valuations performed by external independent valuators. When the Group's internal valuations are different to that of the external independent valuers, detailed procedures are performed to substantiate the differences, whereby the IVC verifies the procedures performed by the front office and considers the appropriateness of any differences to external independent valuations.

#### 13.2 Fair value measurements

#### Valuation inputs

IFRS 13 requires an entity to classify fair values measured and/or disclosed according to a hierarchy that reflects the significance of observable market inputs. The three levels of the fair value hierarchy are defined as follows.

#### Quoted market prices - Level 1

Fair values are classified as Level 1 if they have been determined using observable prices in an active market. Such fair values are determined with reference to unadjusted quoted prices for identical assets or liabilities in active markets where the quoted price is readily available, and the price represents actual and regularly occurring market transactions on an arm's length basis. An active market is one in which transactions occur with sufficient volume and frequency to provide pricing information on an ongoing basis.

#### Valuation technique using observable inputs – Level 2

Fair values classified as Level 2 have been determined using models for which inputs are observable in an active market.

A valuation input is considered observable if it can be directly observed from transactions in an active market, or if there is compelling external evidence demonstrating an executable exit price.

#### Valuation technique using significant unobservable inputs – Level 3

Fair values are classified as Level 3 if their determination incorporates significant inputs that are not based on observable market data (unobservable inputs). An input is deemed significant if it is shown to contribute more than 10% to the fair value of an item. Unobservable input levels are generally determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

#### Judgemental inputs on valuation of principal instruments

The following summary sets out the principal instruments whose valuation may involve judgemental inputs:

#### Debt securities and treasury and other eligible bills

These instruments are valued, based on quoted market prices from an exchange, dealer, broker, industry group or pricing service, where available. Where unavailable, fair value is determined by reference to quoted market prices for similar instruments or, in the case of certain mortgage-backed securities, valuation techniques using inputs derived from observable market data, and, where relevant, assumptions in respect of unobservable inputs.

#### 13. Assets and liabilities held at fair value (continued)

#### 13.2 Fair value measurements (continued)

#### Equity instruments

Equity instruments are valued, based on quoted market prices from an exchange, dealer, broker, industry group or pricing service, where available. Where unavailable, fair value is determined by reference to quoted market prices for similar instruments or by using valuation techniques using inputs derived from observable market data, and, where relevant, assumptions in respect of unobservable inputs.

Also included in equity instruments are non-public investments, which include investments in venture capital organisations. The fair value of these investments is determined using appropriate valuation methodologies which, dependent on the nature of the investment, may include discounted cash flow analysis, enterprise value comparisons with similar companies and price:earnings comparisons. For each investment, the relevant methodology is applied consistently over time.

#### Derivatives

Derivative contracts can be exchange-traded or traded over the counter ("OTC") derivatives. OTC derivative contracts include forward, swap and option contracts related to interest rates, bonds, foreign currencies, credit spreads, equity prices and commodity prices or indices on these instruments. Fair values of derivatives are obtained from quoted market prices, dealer price quotations, discounted cash flow and option pricing models.

#### Loans and advances

The disclosed fair value of loans and advances to banks and customers is determined by discounting contractual cash flows. Discount factors are determined using the relevant forward base rates (as at valuation date) plus the originally priced spread. Where a significant change in credit risk has occurred, an updated spread is used to reflect valuation date pricing. Behavioural cash flow profiles, instead of contractual cash flow profiles, are used to determine expected cash flows where contractual cash flow profiles would provide an inaccurate fair value.

#### Deposits, debt securities in issue and borrowed funds

Deposits, debt securities in issue and borrowed funds are valued using discounted cash flow models, applying rates currently offered for issuances with similar characteristics. Where these instruments include embedded derivatives, the embedded derivative component is valued using the methodology for derivatives.

The fair value of amortised cost deposits repayable on demand is considered to be equal to their carrying value. For other financial liabilities at amortised cost the disclosed fair value approximates the carrying value because the instruments are short term in nature or have interest rates that reprice frequently.

#### 13.3 Fair value adjustments

The main valuation adjustments required to arrive at a fair value are described as follows:

#### Bid-offer valuation adjustments

For assets and liabilities where the Group is not a market maker, mid-prices are adjusted to bid and offer prices respectively unless the relevant midprices are reflective of the appropriate exit price as a practical expedient given the nature of the underlying instruments. Bid-offer adjustments reflect expected close out strategy and, for derivatives, the fact that they are managed on a portfolio basis. The methodology for determining the bid-offer adjustment for a derivative portfolio will generally involve netting between long and short positions and the bucketing of risk by strike and term in accordance with hedging strategy. Bid-offer levels are derived from market sources, such as broker data. For those assets and liabilities where the Group is a market maker and has the ability to transact at, or better than, mid-price (which is the case for certain equity, bond and vanilla derivative markets), the mid-price is used, since the bid-offer spread does not represent a transaction cost.

#### Uncollateralised derivative adjustments

A fair value adjustment is incorporated into uncollateralised derivative valuations to reflect the impact on fair value of counterparty credit risk, as well as the cost of funding across all asset classes.

#### Model valuation adjustments

Valuation models are reviewed under the Group's model governance framework. This process identifies the assumptions used and any model limitations (for example, if the model does not incorporate volatility skew). Where necessary, fair value adjustments will be applied to take these factors into account. Model valuation adjustments are dependent on the size of the portfolio, complexity of the model, whether the model is market standard and to what extent it incorporates all known risk factors. All models and model valuation adjustments are subject to review on at least an annual basis.

### 13. Assets and liabilities held at fair value (continued)

#### 13.4 Fair value hierarchy

The following table shows the Group's assets and liabilities that are recognised and subsequently measured at fair value and are analysed by valuation techniques. The classification of assets and liabilities is based on the lowest level input that is significant to the fair value measurement in its entirety.

nurety.	Group

Notes

#### 13. Assets and liabilities held at fair value (continued)

#### 13.5 Measurement of assets and liabilities categorised at Level 2

The following table presents information about the valuation techniques and significant observable inputs used in measuring assets and liabilities categorised as Level 2 in the fair value hierarchy:

Category of asset/liability	Valuation techniques applied	Significant observable inputs
Cash, cash balances and balances with central banks	Discounted cash flow models	Underlying price of market traded instruments and/or interest rates
Loans and advances to banks	Discounted cash flow models	Interest rate and/or money market curves
Trading and hedging portfolio assets and liabilities Debt instruments	Discounted cash flow models	Underlying price of market traded instruments
Debt instruments	Discounted cash now models	and/or interest rates
Derivative assets		
Commodity derivatives	Discounted cash flow model, option pricing, futures pricing and/or exchange traded fund ("ETF") models	Spot price of physical or futures, interest rates and/or volatility
Credit derivatives	Discounted cash flow and/or credit default swap (hazard rate) models	Interest rate, recovery rate, credit spread and/or quanto ratio
Equity derivatives	Discounted cash flow, option pricing and/or futures pricing models	Spot price, interest rate, volatility and/or dividend stream
Foreign exchange derivatives	Discounted cash flow and/or option pricing models	Spot price, interest rate and/or volatility
Interest rate derivatives	Discounted cash flow and/or option pricing models	Interest rate curves, repurchase agreement curves, money market curves and/or volatility
Equity instruments	Net asset value	Underlying price of market traded instruments
Money market assets	Discounted cash flow models	Money market rates and/or interest rates
Loans and advances to customers	Discounted cash flow models	Interest rate and/or money market curves
Investment securities and investments linked to investment contracts	Listed equity: market bid price. Other items: discounted cash flow models	Underlying price of the market traded instrument, interest rate curves
Deposits from banks	Discounted cash flow models	Interest rate curves and/or money market curves
Deposits due to customers	Discounted cash flow models	Interest rate curves and/or money market curves
Debt securities in issue and other liabilities	Discounted cash flow models	Underlying price of the market traded instrument and/or interest rate curves

#### 13.6.1 Significant transfers between levels

During the prior reporting period, it was determined that significant transfers between levels of the assets and liabilities held at fair value occurred. Treasury bills of R18,5bn were transferred from Level 1 to Level 2, as these are held in an inactive market.

Transfers out of Level 3 and into Level 2 arise where unobservable inputs become observable and/or unobservable inputs are no longer considered to be significant to the valuation of an instrument.

Transfers have been reflected as if they had taken place at the beginning of the year.

#### 13. Assets and liabilities held at fair value (continued)

#### 13.7 Unrealised gains and losses on Level 3 assets and liabilities

The total unrealised gains and losses for the reporting period on Level 3 positions held at the reporting date are set out below:

	Trading and hedging portfolio assets Rm	Other assets Rm	Loans and advances to customers Rm	2015 Investment securities Rm	Investments linked to investment contracts Rm	Non-current assets held for sale Rm	Total assets at fair value Rm
Gains and losses from banking and trading activities	96	_	(28)	48			116

#### 13. Assets and liabilities held at fair value (continued)

#### 13.8 Sensitivity analysis of valuations using unobservable inputs

As part of the Group's risk management processes, stress tests are applied on the significant unobservable parameters to generate a range of potentially possible alternative valuations. The assets and liabilities that impact this sensitivity analysis most are those with the more illiquid and/or structured portfolios. The stresses are applied independently and do not take account of any cross correlation between separate asset classes that would reduce the overall effect on the valuations.

The following table reflects how the unobservable parameters were changed in order to evaluate the sensitivities of Level 3 financial assets and liabilities:

#### Significant unobservable parameter

Significant unobservable parameter	Positive/(negative) variance applied to parameters
Credit spreads	100/(100) bps
Volatilities	10/(10)%
Basis curves	100/(100) bps
Yield curves and repo curves	100/(100) bps
Future earnings and marketability discount	15/(15)%
Funding spreads	100/(100) bps

A significant parameter has been deemed to be one which may result in a charge to the profit or loss, or a change in the fair value asset or liability of more than 10% or the underlying value of the affected item. This is demonstrated by the following sensitivity analysis which includes a reasonable range of possible outcomes:

		2015			
		Potential effect recorded in profit or loss	Potential effect recorded directly in equity		
	Significant unobservable parameters	Favourable/(Unfavourable) Rm	Favourable/(Unfavourable) Rm		
Deposits due to customers	BAGL/Absa funding spread	_/_	—/—		
Investment securities and investments linked to investment contracts	Risk adjustment yield curves, future earnings and marketability discount	—/—	_/_		
Loans and advances to customers	Credit spreads	235/246	/		
Other assets	Volatility, credit spreads	—/—	_/		
Trading and hedging portfolio assets	Volatility, credit spreads, basis curves, yield curves, repo curves, funding spreads	107/107	_/		
Trading and hedging portfolio liabilities	Volatility, credit spreads, basis curves, yield curves, repo curves, funding				
	spreads	15/15	/		
Other liabilities	Volatility, credit spreads	/	—/—		
		357/368	_/_		

		2014			
		Potential effect recorded in profit or loss	Potential effect recorded directly in equity		
	Significant unobservable parameters	Favourable/(Unfavourable) Rm	Favourable/(Unfavourable) Rm		
Deposits due to customers Investment securities and investments linked to investment contracts	BAGL/Absa funding spread Yield curves, future earnings and marketability discount,	_/	_/		
Loans and advances to customers	comparator multiples Credit spreads	672/126 1 037/23	/		
Other assets Trading and hedging portfolio assets	Volatility, credit spreads Volatility, credit spreads	3/3	/		
Trading and hedging portfolio liabilities	curves, yield curves, repo curves, funding spreads Volatility, credit spreads, basis	/	/		
Other liabilities	curves, yield curves, repo curves, funding spreads Volatility, credit spreads	34/34 28/28	/ /		
		1 774/214	/		

#### 13. Assets and liabilities held at fair value (continued)

#### 13.9 Measurement of assets and liabilities at Level 3

The following table presents information about the valuation techniques and significant unobservable inputs used in measuring assets and liabilities categorised as Level 3 in the fair value hierarchy:

			2015	2014	
Category of asset/ liability	Valuation techniques applied	Significant unobservable inputs	Range of estimates utilised for the unobservable inputs		
Loans and advances to customers	Discounted cash flow and/or dividend yield models	Credit spreads	0,96% to 3,99%	0,96% to 3,99%	
Investment securities and investments linked to investment contracts	Discounted cash flow models, third-party valuations, earnings multiples and/or income capitalisation valuations	Risk adjusted yield curves, future earnings, marketability discounts and/or comparator multiples	Discount rates between 8% and 11,5%, comparator multiples between 5 and 10,5	Discount rates between 9,7% and 17,9%, comparator multiples between 5,5 and 6	
Trading and hedging portfolio assets and liabilities Debt instruments	Discounted cash flow models	Credit spreads	0,9% to 3,5%	0,9% to 3,5%	
Derivative assets				00/ - 10 150/	
Credit derivatives	Discounted cash flow and/or credit default swap (hazard rate) models	Credit spreads, recovery rates and/or quanto ratio	0,0% to 23,64%	0% to 13,45%	
Equity derivatives	Discounted cash flow, option pricing and/or futures pricing models	Volatility and/or dividend streams (greater than 3 years)	17,82% to 67,71%	18,16% to 48,20%	
Foreign exchange derivatives	Discounted cash flow and/or option pricing models	African basis curves (greater than 1 year)	(10,00%) to 10,50%	(10,74%) to 6,53%	
Interest rate derivatives	Discounted cash flow and/or option pricing models	Real yield curves (greater than 1 year), repurchase agreement curves (greater than 1 year), funding spreads	0,58% to 4,24%	(1,56%) to 10,04%	
Deposits due to customers	Discounted cash flow models	Barclays Africa Group Limited's funding spreads (greater than 5 years)	1,52% to 2,15%	0,85% to 1,2%	
Debt securities in issue	Discounted cash flow models	Funding curves (greater than 5 years)	(0,20%) to 3,35%	1,28% to 1,38%	
Investment properties	Discounted cash flow models	Estimates of periods in which rental units will be disposed of	1 to 7 years	2 to 7 years	
		Annual selling price escalations	0% to 6%	0% to 6%	
		Annual rental escalations	0% to 10%	0% to 10%	
		Expense ratios	26% to 51%	22% to 75%	
		Vacancy ratio	1% to 18%	2% to 15%	
		Income capitalisation rates	8% to 12%	10% to 12%	
		Risk adjusted discount rates	13% to 14%	14% to 16%	

For assets or liabilities held at amortised cost and disclosed in levels 2 or 3 of the fair value hierarchy, the discounted cash flow valuation technique is used. Interest rates and money market curves are considered unobservable inputs for items which mature after five years. However, if the items mature in less than five years, these inputs are considered observable.

For debt securities in issue held at amortised cost, a further significant input would be the underlying price of the market traded instrument. The sensitivity of the fair value measure is dependent on the unobservable inputs. Significant changes to the unobservable inputs in isolation will have either a positive or negative impact on fair values.

#### 13. Assets and liabilities held at fair value (continued)

#### 13.10 Unrecognised gains/(losses) as a result of the use of valuation models using unobservable inputs

The amount that has yet to be recognised in the statement of comprehensive income that relates to the difference between the transaction price and the amount that would have arisen had valuation models using unobservable inputs been used on initial recognition, less amounts subsequently recognised, is as follows:

	2015 Rm	2014 Rm
<b>Opening balance at the beginning of the reporting period</b> New transactions Amounts recognised in profit or loss during the reporting period	(52) (91) 38	(55) (23) 26
Closing balance at the end of the reporting period	(105)	(52)

#### 13.11 Third-party credit enhancements

There were no significant liabilities measured at fair value and issued with inseparable third-party credit enhancements.

#### 14. Reporting changes overview

#### **Reclassification changes**

In terms of the Group's policy, financial assets with a maturity of less than three months should be reported as "Cash, cash balances and balances with central bank", while financial assets with a maturity of longer than three months are reported as "Investment securities". Based on an analysis performed on the maturity periods of treasury bills, in the Rest of Africa, it was established that some treasury bills' maturity period extended beyond three months and had been reported as "Cash, cash balances and balances with central banks". These items are now being reported as "Investment securities".

The impact of these changes on the statement of financial position is as follows:

#### Summary consolidated statement of financial position as at 31 December 2014

	As previously reported Rm <sup>(1)</sup>	Internal reclassifications Rm	Restated Rm
<b>Assets</b> Cash, cash balances and balances with central banks Investment securities	50 335 85 886	(11 232) 11 232	39 103 97 118

#### Summary consolidated statement of financial position as at 31 December 2013

	As previously reported Rm <sup>(1)</sup>	Internal reclassifications Rm	Restated Rm
<b>Assets</b> Cash, cash balances and balances with central banks Investment securities	50 130 79 004	(14 032) 14 032	36 098 93 036
