21. (a) Type of Return:	Indexed Redemption Amount Notes

If the Final Index Valuation Date is a Disrupted Day, it will be subject to Modified Postponement, as described below. “Modified Postponement” means that in respect of any Exchange Business Day which is a Disrupted Day, the Final Index Valuation Date, as applicable will be the first succeeding Valid Date. If the first succeeding Valid Date has not occurred before or on the eighth Scheduled Trading Day immediately following the original date, then that eighth Scheduled Trading Day will be deemed to be the Final Index Valuation Date and the Calculation Agent will determine the level of the Index for that Final Index Valuation Date (i.e. that eighth Scheduled Trading Day) in a commercially reasonable manner. For purposes hereof, a “Valid Date” means a Scheduled Trading Day that is not a Disrupted Day and the Index Valuation Date does not or is not deemed to occur. “Exchange Business Day” means a Scheduled Trading Day on which: a) the Index Sponsor actually publishes the closing level of the Index; and b) each Financial Exchange or each Index Component Exchange, as the case may be, is actually open for trading during its regular trading session, notwithstanding the relevant Financial Exchange and/or any relevant Index Component Exchange, as the case may be, closing prior to its Scheduled Closing Time; “Scheduled Trading Day” means any day on which: (a) the Index Sponsor is scheduled to publish the closing level of the Index; and

	in respect of the Index Component Exchange on which such Component Security is principally traded; b. an Exchange Disruption in respect of such Component Security, which the Calculation Agent determines is material, at any time during the one-hour period that ends at the relevant Index Valuation Time in respect of the Index Component Exchange on which such Component Security is principally traded; or c. an Early Closure in respect of such Component Security; AND (b) the aggregate of all Component Securities in respect of which a Trading Disruption, an Exchange Disruption or an Early Closure occurs or exists comprises 20 per cent. or more of the level of the Index; OR (c) the occurrence or existence, in respect of futures or options contracts relating to the Index, of: a. a Trading Disruption; b. an Exchange Disruption, which in either case the Calculation Agent determines is material, at any time during the one hour period that ends at the Index Valuation Time in respect of the Index Component Exchange; or c. an Early Closure, in each case in respect of such futures or options contracts. For the purposes of determining whether a Market Disruption Event exists in respect of a Component Security at any time, if a Market Disruption Event occurs in respect of such Component Security at that time, then the relevant percentage contribution of that Component Security to the level of the Index shall be based on a comparison of the portion of the level of the Index attributable to that Component Security to the overall level of the Index, in each case using the official opening weightings as published as part of the market "opening data".
(d) Trading Disruption:	Means any suspension of or limitation imposed on trading by the relevant Index Component Exchange or otherwise and whether by reason of movements in price exceeding limits permitted by the relevant Index Component Exchange or otherwise: (i) relating to any Component Security on the Index Component Exchange in respect of such Component Security; or (ii) in futures or options contracts relating to the Index or a Component Security on the Index Component Exchange.

B. If on or prior to the Final Index Valuation Date the Index Sponsor announces that it will make a material change in the formula for or the method of calculating the Index or in any other way materially modifies the Index (other than a modification prescribed in that formula or method to maintain the Index in the event of changes in constituent stock and capitalisation and other routine events) (an "Index Modification") or permanently cancels the Index and no Successor Index exists (an

	“Index Cancellation”) (such Index Modification and Index Cancellation being an “Index Adjustment Event”) then the Calculation Agent shall determine whether such Index Adjustment Event has a material effect on the Notes and, if so, shall calculate the Final Redemption Amount using, in lieu of a published level of the Index, the level for the Index as at the Final Index Valuation Date as determined by the Calculation Agent in accordance with the formula for and method of calculating the Index last in effect prior to the relevant Index Adjustment Event but using only those Component Securities that comprised the Index immediately prior to such Index Adjustment Event.
